Hey Greg,

For the response all data management should be coordinated through R8(McComb), R6(Delgado) and R9(Nattis), all are cc'd. They are the main data mgmt POCs for the response. If you haven't been in contact with them yet you should definitely touch base. For these types of responses it's very important EPA coordinates all data management to activity.

There is also an incident data management plan that Weston solutions is maintaining for EPA. That may provide you some guidance as to which analytical fields in Scribe are being used to support the response. Janine Latham cc'd is the data POC for Weston.

If you have questions on how to load Scribe as per the data mgmt plan ERT software support can provide you with whatever support you require.

Hello Greg.

Scribe is an ERT developed tool for collection of site data as well as laboratory data. Your Promium LIMS should be able to upload into Scribe.

Joe Schaefer with ERT is the Scribe developer. His info is: SCHAEFER, JOSEPH W. Systems Development 732-906-6920

He should be able to help you, if he hasn't been deployed to the site already. I am cc him

on this email to respond to you if he is available.

Try contacting him by phone. If you cant get ahold of him, send me an email and I can see if I can get you another contact.

Subject: LIMS and Scribe

Good afternoon,

Larry Zintek here in Region 5 gave me your name as someone who may have information on Scribe. By now you may have seen or read about the accidental discharge along the Animas River in Colorado. Scribe is the requested data format for the inter-regional assistance project. We have Promium LIMS, but have never used Scribe.

If you have some info., can you pass it along? Larry thought you had a contractor that uses Scribe.

Thank you,

Greg
